

Your 5 moments for hand hygiene at the point of care

Adapted from the WHO Alliance for Patient Safety 2006

1 BEFORE RESIDENT CONTACT	WHEN? Clean your hands before touching a resident when approaching him/her. WHY? To protect the resident against harmful germs carried on your hands.
2 BEFORE A CLEAN/ASEPTIC PROCEDURE	WHEN? Clean your hands immediately before any clean/aseptic procedure. WHY? To protect the resident against harmful germs, including the resident's own, from entering his/her body.
3 AFTER BODY FLUID EXPOSURE RISK	WHEN? Clean your hands immediately after an exposure risk to body fluids (and after glove removal). WHY? To protect yourself and the healthcare environment from harmful resident germs.
4 AFTER RESIDENT CONTACT	WHEN? Clean your hands after touching a resident and her/his immediate surroundings, when leaving the resident's side. WHY? To protect yourself and the healthcare environment from harmful resident germs.
5 AFTER CONTACT WITH RESIDENT'S SURROUNDINGS	WHEN? Clean your hands after touching any object or furniture in the resident's immediate surroundings when leaving—even if the resident has not been touched. WHY? To protect yourself and the healthcare environment from harmful resident germs.
